

C-TECNICS ACCESSORIES

Portable Power Supply

The C-Tecnics Portable Power Supply (PPS) offers a real advanced in diving in remote locations where there isn't access to mains power supplies. A step-up inverter provides mains voltage at 240v to the C-Vision system from the batteries contained within the heavy duty transport case. The batteries can be recharged from universal mains power once back at base.

Push to Talk Microphone

The C-Tecnics Push to Talk (PPT) microphone comes as standard with most C-Tecnics communication systems. This rugged PPT microphone offer clear communication in whatever operation it is being used for.

Tenders Headset

This is C-Tecnics standard headset, supplied as an optional extra with most of C-Tecnics communication systems. Some customers working in noisy environment request a headset, and the C-Tecnics headset has been tried and tested in the harshest of conditions and found to be superb.

(Continued)

Portable Hard Drive

An optional extra for C-Tecnics communication and video systems. This rugged and portable hard drive can be used for further recording extensions or to download and transfer data from communication and video systems.

Camera and Lamp Brackets

C-Tecnics Camera & Lamp Brackets are commonly used with the CT3008 Inspection Camera and the CT 4003 LED Lamp. They allow the camera and lamp to be fixed to most diving helmets and masks used within the diving industry.

Pistol Grip

The C-Tecnics hand held pistol grip was designed for use of the CT3008 Inspection Camera and the CT 4003 LED Lamp for hand held inspection work.
