

The C-Torch is specially designed for safe use in Helium environments such as closed bells where the risk of helium ingress can potentially cause serious issues when the pressure cannot be released during depressurisation of the bell. The C-Torch incorporates a Helium relief valve, allowing the pressure inside the torch to be vented when a pressure difference exists.

## Specification

- Working Pressure: 400m
- 1200 lumen output via a 4 LED Cluster
- Weight (in air): 1100g
- Dimensions: 245 x 67mm
- Power: 8x AA Non-rechargeable Batteries
- Battery Life: 8 hours (depending on brand)
