

The C-Tecnicas Hyperbaric Chamber Intercom has been designed for mounting in chamber control panels to provide clear and crisp communications to both the entry lock and main lock of Air Diving decompression chambers.

Part No: CT7002

Dimensions

Half rack x 3u high

Nominally 241 Wide x 131 High x 200 Deep

Weight

3.5Kgs

Standby Current

96 - 230VAC Mains, 50-60Hz

External optional 12v input

Standby current 48mA

Performance

400Hz to 10KHz

7.8W into 8 Ohm

Exceptional performance has been achieved through the development of up to date electronics utilising digital speech processing to optimise the transmittal of diver's speech signals and their attenuation under pressurised conditions. The rack-mounted design enables easy incorporation into modern control panels. A hostile environment version is also available for chambers in exposed areas.

- Loudspeaker comms with PTT (Press to talk) button.
- Hand held microphone included for option of use in high noise environments.
- Headset output option - headset not included but available.
- Recording output via phono socket.
- 12v external power supply option for emergency use battery.
- Waterproof speaker with exceptional sound quality.
- Entry lock/main lock selector switch.
